

Servicing And Calibration

Plastic Systems have an in-house service department with trained and certified technicians, that provide servicing, calibration, trouble shooting and repairs for all the tools we support which include Ritmo, PFS, Grossenbacher and Novapress.

Our service workshop has state-of-the-art manufacturers approved testing and calibration equipment and we hold a range of spare parts, so we can get your machines and tools back in the field as quickly as possible.

As authorised repair agents we extend our services to all repairs and maintenance even for items that have not been purchased through Plastic Systems.

Contact us on 0800 000 546 or email sales@plasticsystems.co.nz
